

5/7/19

### **Who we are: Ritter Pharma**

Ritter Pharmaceuticals ([www.RitterPharma.com](http://www.RitterPharma.com)) develops innovative therapeutic products that modulate the gut microbiome to treat gastrointestinal diseases. The Company's lead asset, RP-G28, has the potential to become the first FDA-approved treatment for lactose intolerance, a condition that affects over one billion people worldwide. RP-G28 is in Phase 3 clinical development with top-line data expected in early Q4 2019. The Company is further exploring the therapeutic potential that gut microbiome changes may have on treating or preventing a variety of diseases including: gastrointestinal diseases, cancer, metabolic, and liver disease.

### **What your role will be**

We have an exciting and flexible opportunity within our business development group for an intern who brings enthusiasm for business development and breaking out of the academic world and experience in scientific publication. The intern will gain experience in and be responsible for:

- Scientific Writing: writing and publishing review and primary scientific articles to support the commercialization activities of the company.
- Business Development: supporting the company's pipeline expansion efforts, including systematic assessment (research and analysis) of the current microbiome and GI landscape, identification of potential indications and targets for expansion

You will be joining a small team where everyone wears a lot of hats. This is a double-edged sword. It provides the opportunity to carve your own path to some degree; there's a lot to do so if there is a specific skillset you would like to build and it fits our activity, we are happy to help you gain the experience. It also means that candidates must be self-starters and problem solvers.

### **Logistics**

Position: 3-6 month, part-time or full-time, minimum of 15h per week

Location: Century City, need to be in office 1-3 days per week, other days can be remote

Manager: position will report into the Director of Business Development

### **Minimum requirements:**

- Masters degree or PhD or current graduate work in microbiome, gastrointestinal diseases, or oncology
- Proven success in publishing primary scientific and review articles

- Excellent time management, attention to detail, organization, and verbal & written communication skills
- Proficiency in MS Office software (Word, Excel, PowerPoint, etc.) is required.
- Ability to work in the U.S., work sponsorship will not be provided

Ritter Pharma is an equal opportunity employer. Qualified applicants will receive consideration for employment without regard to sex, gender identity, sexual orientation, race, color, religion, national origin, disability, protected veteran status, age, or any other characteristic protected by law.

If interested and qualified, please send your resume, publications list, and a short description of what makes you interested in this internship (what you want to get out of it) to [Aida@RitterPharma.com](mailto:Aida@RitterPharma.com).
